NTSC

## ADVANCED FEATURE MENU

DVD VIDEO BLACKBOARD

## BARCODE/COMMAND STACK

# INTRODUCTION

The Basic Operating Instructions denotes handling methods while this Advanced manual explains original features of the DVD-V7200 player.

## ● Connection of mouse and keyboard

How to connect the mouse and keyboard to this unit is explained in this section

## ● Player Control Using the Mouse

Control method using the mouse is explained in this section

## ● Advanced Feature Menu

Besides the player menu (explained in the Basic Operation edition) this unit also has an Advanced Feature menu. This section explains details of weekly timer and power on start setup etc., using this menu

## ● Video Blackboard Function

Using the mouse and keyboard, pictures, lines and characters (alphabet, numbers, symbols) can be drawn during video playback or displayed alone.

Free lines can be drawn on the picture during playback, and pre-drawn drawings or characters can be superimposed on the image and displayed at a specified position during playback.

Curved lines can be drawn with the mouse

Pre-drawn drawings or characters can be automatically superimposed on the playback picture

### Uses

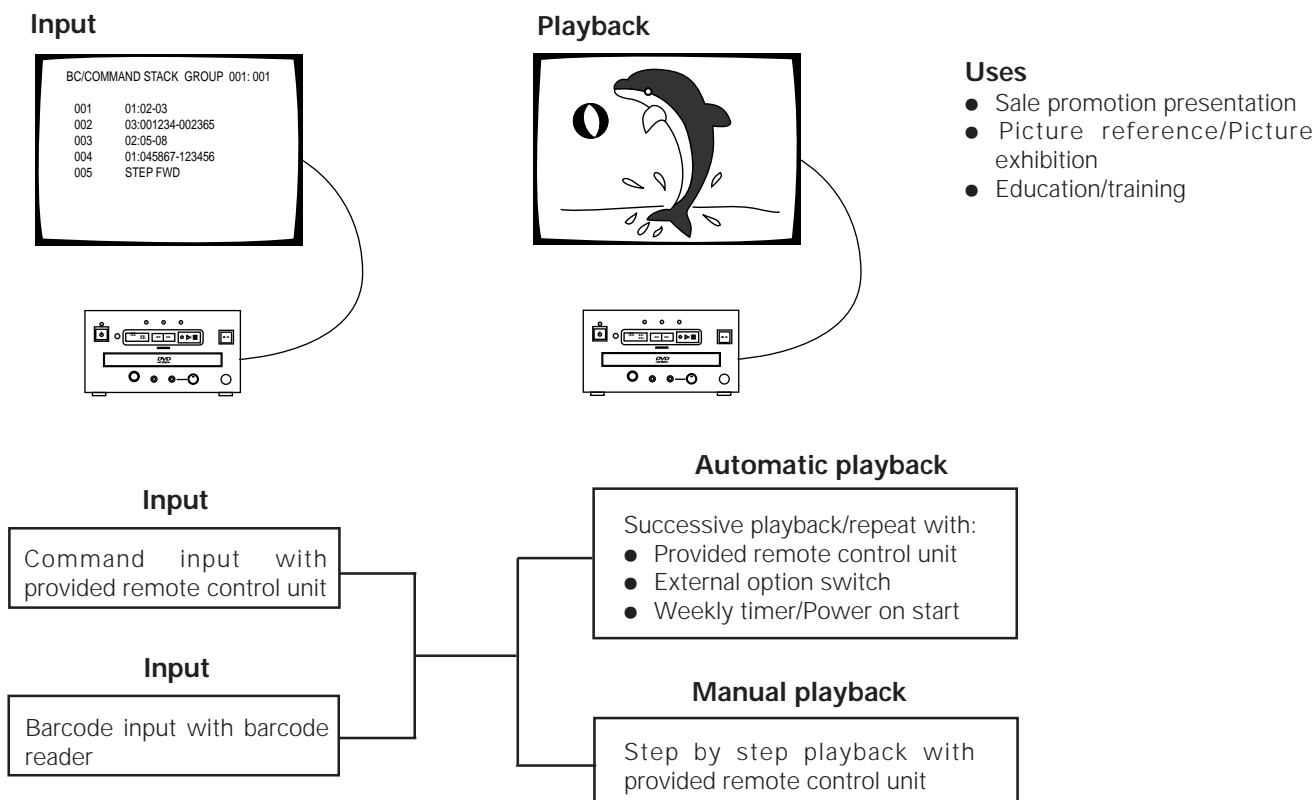

- A pointer
- For picture subtitle
- For picture explanation
- For picture masking

## ● Barcode/command stack function

Various barcodes or commands used to control the DVD-V7200 can be stored in this player's memory in advance.

Memorized content can be recalled for successive or step by step execution.

With this function, program playback is possible using the player alone without the need for a computer, controller or advance registration of barcodes.

## ● Others

External synchronizing function

Playback time/Power supply time display

# CONNECTION OF MOUSE AND KEYBOARD

A commercially available PS/2 mouse or PS/2 keyboard can be connected to this unit's mouse/keyboard connector as follows.

1. Turn this unit's POWER off to set it to the standby mode.
  2. Connect the PS/2 \*mouse or PS/2 \*keyboard to this unit's MOUSE/KEYBOARD connector.
  3. Turn this unit's POWER ON.
- Connection is now complete.

If you want to use both the mouse and keyboard, connect them using a commercially available "Y" cable.

**Note:**

- The power rating of this MOUSE/KEYBOARD connector is no more than 100mA. Do not use a mouse or keyboard with a current drain exceeding the rating of 100mA.
- Certain commercially available PS/2 mouse models, PS/2 keyboard models and "Y" cables may not be compatible with this unit. For details, please consult PIONEER technical support.

\* PS/2 is a registered trademark of IBM corporation.

# PLAYER CONTROL USING A MOUSE

Mouse operation is possible by connecting a PS/2\* mouse and turning power ON.

## PLAYER CONTROL ICON

Pressing the mouse's left and right button simultaneously or clicking the right button while holding the left button displays the player control icons on the bottom left of the screen. When the mouse pointer is placed on a player control icon, the pointer changes from  to . While the pointer is in the form of , clicking with the left mouse button performs the same operation as the remote control unit button.

Discs Function	DVD	VIDEO CD	CD
	YES	YES	YES
	YES	YES	YES
	YES	YES	NO
	YES	YES	YES
	YES	NO	NO
	YES	YES	YES
	YES	YES	YES

Clicking the mouse's right button while  is placed on the right half  buttons of the player control icon performs the same operation as that when the  button of the remote control unit is pressed. In the same way, clicking the mouse's right button while  is placed on the left half  button of the player control icon performs the same operation as that when the  and then  button of the remote control unit is pressed.

To make the player control icons disappear, perform the same operation as for displaying them, i.e. click the mouse's right button while holding the left button.

### CAUTION

While player control icons are displayed, clicking the mouse's right button cannot activate the video blackboard function. To activate the video blackboard function, make the player control icons disappear before clicking the mouse's right button. (Refer to page 18.)

# ADVANCED FEATURE MENU SETTINGS

There are 13 items for setup of the DVD-V7200's original functions. Menu operation is carried out with the remote control unit.

## ● WEEKLY TIMER: OFF/ON

This can set the time for turning power on/off for each day of the week together with the title and chapter (or COMMAND STACK) with which playback is to be started. With this function, unattended operation is possible.

## ● POWER ON START: OFF/ON

This can set whether playback is to be started automatically (ON) or not (OFF) when the power is turned on.

## ● TITLE PLAY MODE: SINGLE/ALL

When this is set to SINGLE, playback stops after having played a title. When it is set to ALL, playback stops after having played all titles\* in a disc.

\* Excluding some discs with menus.

## ● REPEAT MODE: OFF/CHAPTER/TITLE/DISC

This item sets what is played repeatedly.

When the TITLE DISPLAY MODE is set to ALL, the DISC mode will be added.

**OFF:** Repeat playback is deactivated.

**CHAPTER:** Only a chapter is played repeatedly.

**TITLE:** Only a title is played repeatedly.

**DISC:** The entire disc is played repeatedly.

## ● BAUD RATE: 4800 bps/9600 bps

This sets the baud rate of the RS-232C interface. The baud rate can be selected between 4800 bps and 9600 bps.

## ● TRAY LOCK: OFF/ON

When this is set to ON, the disc tray is locked and cannot be opened or closed. This item helps prevent disc theft.

## ● BLACKBOARD LOCK: OFF/ON

Normally, clicking the mouse's right button will display the video blackboard input screen but when this is set to ON, the blackboard is locked and will not be activated when the mouse's right button is pressed.

## ● STILL MODE: FRAME/FIELD

Set this item to FIELD if the still image fluctuates.

## ● D.R.COMP.: 9 options including OFF/1 to 8 (MAX)

D.R.COMP. stands for Dynamic Range Compression. As the DVD audio has a wide dynamic range, the words may be hard to be understood through your stereo system or TV. In this case, set this item as required.

## CAUTION:

*D.R.COMP. affects only discs recorded in Dolby Digital (AC-3).*

## ● MARK FRAME SQUELCH: OFF/ON

The picture will be paused at the set mark frame command (end point).

**ON:** Frame search is used near the end point to confirm the accuracy of the mark frame.

**OFF:** Although transition from playback to still picture is smooth, there is error between mark frame set value and actual still picture.

## ● SQUELCH DUR SEARCH: OFF/ON

To set whether a black screen is displayed or not each time search is used. (excluding frame search)

## ● SYNC OUT (DURING SQ): OFF/ON

**ON:** The video output is stopped except during playback or a menu screen.

**OFF:** Video is always output.

## ● STACK MODE OSD:ON/OFF

For ON/OFF control of OSD display during stack execute.

# ADVANCED FEATURE MENU SETUP

Advanced feature menu setting is done with the remote control unit. Setup can be done either when a disc is playing, or when the player is stopped.

## DISPLAYING THE MENU SCREEN

Press and hold the  button until the menu screen appears (for about 1.5 sec.).

- The menu screen is displayed.

### Menu to the 1/2 screen

MENU	page 1/2
WEEKLY TIMER	OFF
POWER ON START	OFF
TITLE PLAY MODE	SINGLE
REPEAT MODE	CHAPTER
BAUD RATE	4800bps
TRAY LOCK	OFF
BLACKBOARD LOCK	OFF
STILL MODE	FRAME
▶D.R.COMP	OFF

### Menu to the 2/2 screen

MENU	page 2/2
▶MARK FRAME SQUELCH	OFF
SQUELCH DUR SEARCH	OFF
SYNC OUT (DURING SQ)	OFF
STACK MODE OSD	ON

Move the ▶ (pointer) to the item you want to set with the remote control unit's  or  button and change the setting with the remote control unit's  or  button.

Menu setup is explained in detail from the next page.

## CLEARING THE MENU SCREEN

Press the  button.

- The menu screen disappears.

### NOTE:

When the menu screen is closed the settings will be stored in the internal memory.

If this unit's power is turned OFF while the menu setup screen is open, settings will be erased without being stored.

Pressing the remote control unit's  or  button will move the ▶ (pointer) on the left side of the setting item up or down. When the menu page 1/2 screen has a ▶ (pointer) at the very bottom part of it, pressing the remote control's  button again will change the menu to the page 2/2 screen. When the menu page 2/2 screen has a ▶ (pointer) at the very top part of it, pressing the remote control's  button again will change the menu to the 1/2 screen.

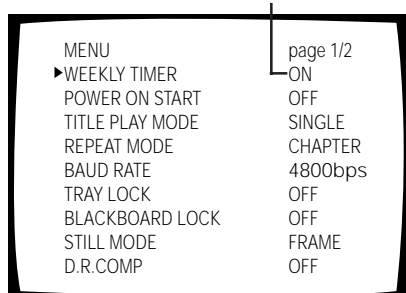

# WEEKLY TIMER OPERATION

1

ON

2

3-4

5

## Tip

The built-in clock is powered by a capacitor. The clock of this unit functions even when it is in the STANDBY mode, provided that the AC cord is plugged into a power outlet. If the AC cord is unplugged, the clock can continue functioning for 3 or 4 days (when the capacitor is fully charged and at 25 deg.C).

## SETTING/CORRECTING THE CURRENT TIME

Set the current date and time.

1. Move the ► (pointer) to "WEEKLY TIMER" by pressing the or .

2. Press the or button and set to ON.

3. Press the .

• The Weekly Timer setting screen is displayed.

4. Press the .

• The date/time setting screen is displayed blinking.

5. Set the time of the day.

• Set figures in order of year (2 digits), month, day, day of the week, hour, minute and second.

These figures can be input in any of the following two methods.

A. Input using the numeric buttons and the NEXT

() button

B. Input using the or button and the ENTER () button

• "A" and "B" in the following description refers respectively to the two operation methods above.

Example) To set to 8:15:00, Wednesday April 29, 1998

A: Press → .

\* The days of the week can be set using the following numeric buttons.

MON.: 0, TUE.: 1, WED.: 2, THU.: 3, FRI.: 4, SAT.: 5, SUN.: 6.

B: Press the or button to select 98 and press

the item to start the setting of the next set of figures (the month in this case).

Set the month, day, day of the week, hour, minute and second, and press the button to complete the setting operation.

## To correct the date or time

When the setting screen appears in step 3 above, press the button so that the figures of the year start to blink. Then press the button 4 times so that the figures of hour blink, and set them with the same method as above.

# WEEKLY TIMER OPERATION

## SETTING THE WEEKLY TIMER

**1.** When the setting screen appears in step 3 on the previous page, press the or button to move ► (pointer) to the day of the week and press the button.

**2.** Set the power ON/OFF time.

**Example 1)** To turn power ON at 10:30 on Wednesday

- Move ► (pointer) to "WED" and press the ENTER button.

**A:** Press → → → → → → → → → → .

**B:** Press the or button to select 10 and press the item to start the setting of the next set of figures. Now set it to 30 and press the button twice.

- If the power OFF time is not set, the timer simply turns power ON.

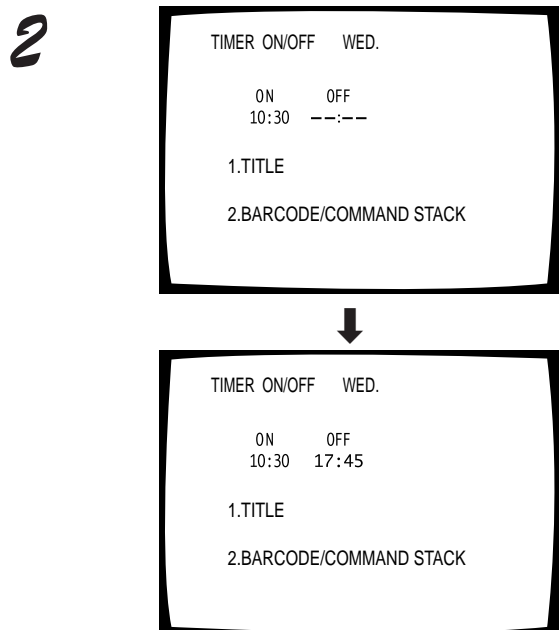

**Example 2):** To turn power ON at 10:30 on Wednesday and turn it off at 17:45

**A:** Press → → → → → → → → → → → → → → .

**B:** Press the or button to select 10 and press the item to set the setting of the next set of figures. Set the subsequent sets of figures to 30, 17 and 45 by repeating the above.

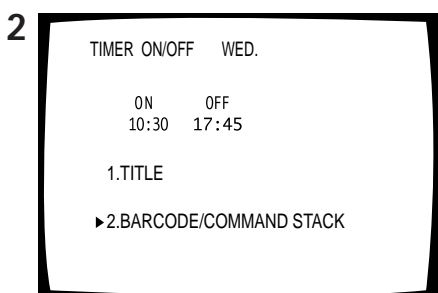

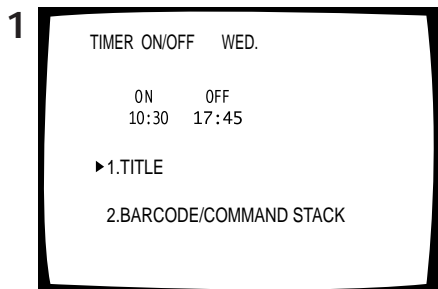

### NOTE:

It is also possible to set only the power OFF time without setting the power ON time. In this case, when power is turned ON manually, it will be turned OFF at the set time.

## WEEKLY TIMER OPERATION

3

3. Set the operation to be performed at the moment timer playback starts.

1. **TITLE: Setup for playing the specified title and chapter.**

- Refer to "Playing the specified title and chapter".

2. **BARCODE COMMAND STACK: Setup for recalling the display of the barcode command stack groups from memory.**

- Refer to "Recalling the display of the barcode command stack groups from memory" on next page.
- Select one of the above with the or button, and press the .

### CAUTION

- This step cannot be performed if the power ON time has not been set.
- The data is written in memory at the moment the timer setup screen is exited. The timer setup will not be stored in memory if power is turned off before or without exiting the screen.
- On a DVD disc that has been setup to start playback automatically, the setup made above will not be applied to the disc.

## CLEARING THE SET TIME

With the TIMER ON/OFF time input screen (shown above) displayed, press the button of the remote control unit.

To clear the set time and return to the list display.

## PLAYING THE SPECIFIED TITLE AND CHAPTER

- Move ► (pointer) to "1 TITLE" and press the .

Example) To begin playback with Chapter 2 of Title 6

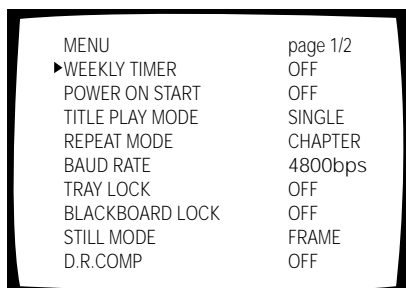

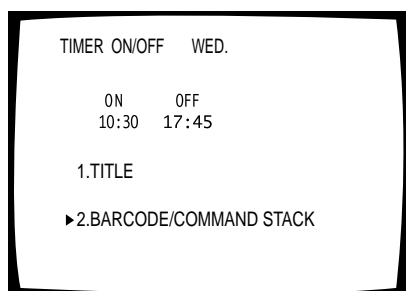

A: Press → → → → → → .

B: Press the or button to select 06 and press the item to start the setting of the next set of figures. Now press the or to select 02 and press the .

### CAUTION

- When a title and chapter are selected, playback continues after the selected chapter only when there is one or more chapter after it. Playback completes at the end of the selected title.
- If repeat playback is set in the Advanced Feature menu, the selected chapter is played first then the set repeat playback starts.
- When setting tracks on a CD or Video CD, please enter the track number in the CHAPTER in the above setting. At this time TITLE and BARCODE/COMMAND STACKS settings will not operate.

## WEEKLY TIMER OPERATION

### SETUP FOR RECALLING THE DISPLAY OF BARCODE/COMMAND STACK GROUPS FROM MEMORY

- Move the pointer to **2. BARCODE/COMMAND STACK** and press

Example) To recall and display Barcode/Command stack group "5"

A: Press **FUNCTION** → **5** **ENTER** → **▶ NEXT**.

B: Press the **8** **UP** or **2** **DOWN** button to select 005 and press the **5** **ENTER** button.

Now the timer setting is complete.

### CAUTION

When a Barcode Command stack group is selected, the command stack within the group will be executed repeatedly regardless of whether the repeat mode in the Advanced Feature menu is set to ON or OFF.

### SETTING THE TIMER FUNCTION TO NOT OPERATE WITH THE WEEKLY TIMER SETTING LEFT AS IS

- Move the **▶** (pointer) to **WEEKLY TIMER** on the Advanced Feature menu screen and set to OFF with the remote control unit's

button.

Specify the title and chapter.

## POWER ON START FUNCTION

1. Move the ► (pointer) to "POWER ON START" by pressing the or button.

2. Set it to ON by pressing the or button.

3. Press the .

- The **POWER ON START** setting screen is displayed.

1. TITLE: Playing the specified title and chapter.

2. BARCODE/COMMAND STACK: Recalling and displaying the Barcode/Command stack groups in memory.

- Select one of the above with the or button, and press the .

1. Playing the specified title and chapter

- Move the ► (pointer) to 1. TITLE and press .

Example) To begin playback with Chapter 2 of Title 6

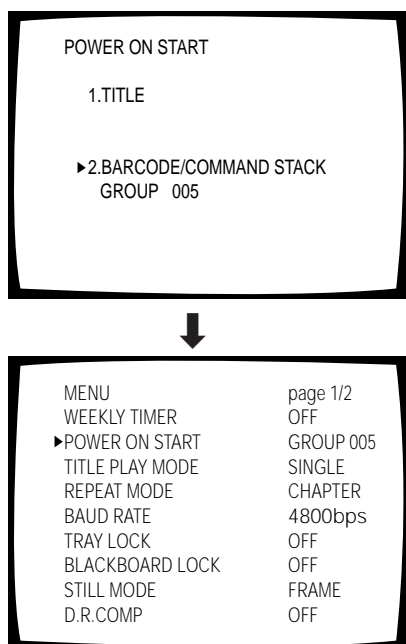

A: Press → → → → → → .

B: Press the or button to select 06 and press the item to start the setting of the next set of figures. Now press the or to select 02 and press the .

### CAUTION

- When setting tracks on a CD or Video CD, please enter the track number in the CHAPTER in the above setting. At this time TITLE and BARCODE/COMMAND STACKS settings will not operate.

## POWER ON START FUNCTION

Specify the Barcode/Command stack.

### 2. Recalling and displaying the Barcode/Command stack groups in memory

- Move the ► (pointer) to 2. BARCODE/COMMAND STACK and press .

Example) To execute Barcode/Command stack group 5

A: Press  →  → .

B: Press the  or  button to select 005 and press the  button.

- The Advanced Feature menu setup screen is displayed again, in which the **POWER ON START** setting is shown. Now the setting of the operation to be performed at power ON is complete.

### CAUTION

With a disc with which playback starts automatically, the operation may differ from the setting.

## TURNING OFF THE POWER ON START FUNCTION

- On the Advanced Feature menu screen, move the ► (pointer) to POWER ON START with the remote control unit's  or  button and select OFF with the remote control unit's  or  button.

# ADVANCED FEATURE MENU DETAILED INFORMATION

## TITLE PLAY MODE SETUP

On the Advanced Feature menu screen, move the ► (pointer) to **TITLE PLAY MODE** with the remote control unit's  or  button and press the remote control unit's  or  button to select **SINGLE** or **ALL**.

### TITLE PLAY MODE SINGLE

In the normal DVD player mode, playback will stop after playback of 1 title on the DVD disc.

### TITLE PLAY MODE ALL

After playback of 1 title on the DVD disc, playback will continue to the next title and play all titles on the disc.

#### NOTE:

Some DVD discs include menus etc., and on these types of discs playback will pause while the menu screen is displayed and the above operations will not function.

## REPEAT MODE SETUP

On the Advanced Feature menu screen, move the ► (pointer) to **REPEAT MODE** with the remote control unit's  or  button and press the remote control unit's  or  button to select between **OFF/CHAPTER/TITLE/DISC**.

When the TITLE DISPLAY MODE is set to ALL, the DISC mode will be added.

- OFF:** In the normal DVD player mode, repeat playback is deactivated.
- CHAPTER:** Only one chapter is played repeatedly. (DVD disc)  
On a CD or V-CD one track is played repeatedly.
- TITLE:** Only one title is played repeatedly.
- DISC:** The entire disc is played repeatedly.

On a CD or V-CD the whole disc is played repeatedly when either TITLE or DISC is selected.

## BAUD RATE SETUP

This function sets the baud rate of the RS-232C interface. The baud rate can be selected between 4800 bps and 9600 bps.

For setup, move the ► (pointer) to **BAUDE RATE** on the Advanced Feature menu screen using the remote control unit's  or  button, and press the remote control unit's  or  button to select between 4800bps and 9600bps.

## TRAY LOCK SETUP

When this mode is set to **ON**, the tray is locked and can not be opened or closed. When a disc is loaded and the **TRAY LOCK** is set to **ON**, the disc can not be ejected until **TRAY LOCK** is set to **OFF** with the remote control unit. Use this function when you do not wish the tray to be openable by others.

For setup, move the ► (pointer) to **TRAY LOCK** on the Advanced Feature menu screen using the remote control unit's  or  button, and press the remote control unit's  or  button to select between **OFF/ON**.

## BLACK BOARD LOCK SETUP

This function locks the black board input mode so that the black board screen is not displayed. Input functions other than player control functions operated with the mouse are prohibited. Use this function when an undetermined number of people are using the player and you do not want the video back board input commands etc., to be changed.

For setup, move the ► (pointer) to **BLACK BOARD** on the Advanced Feature menu screen using the remote control unit's  or  button and press the remote control unit's  or  button to select between **OFF/ON**.

## STILL MODE SETUP

The paused picture of scenes with much movement may fluctuate during **STILL**. In this case, changing the **FRAME** to **FIELD** will stop the fluctuation, making the picture easier to see.

For setup, move the ► (pointer) to **BLACK BOARD** on the Advanced Feature menu screen using the remote control unit's  or  button and press the remote control unit's  or  button to select between **FRAME/FIELD**.

## D.R.COMP SETUP (DYNAMIC RANGE COMPRESSION)

As the DVD audio has a wide dynamic range, words may be hard to understand through your stereo system or TV. In this case set this function as required.

There are 9 levels that can be selected: **OFF/1** to **8 (MAX)**. For setup, move the ► (pointer) to **P.R.COMP** on the Advanced Feature menu screen using the remote control unit's  or  button and press the remote control unit's  or  button to select between **OFF/1** to **8 (MAX)**.

## ADVANCED FEATURE MENU DETAILED INFORMATION

### MARK FRAME SQUELCH SETUP

Within mark frame input commands, the picture will be paused at mark frame (playback stop point).

When set to **ON**, frame search is used near the end point to confirm the accuracy of the mark frame.

When set to **OFF**, although the transition from playback picture to still picture will be smooth, some amount of frame error between the mark frame set value and the actual still picture may occur.

For setup, move the ► (pointer) to **MARK FRAME SQUELCH** on the Advanced Feature menu screen using the remote control unit's  or  button and press the remote control unit's  or  button to select between **OFF/ON**.

### SQUELCH DUR SEARCH SETUP

**ON:** Screen momentarily turns black during search.

**OFF:** Screen does not momentarily turn black during search.

For setup, move the ► (pointer) to **SQUELCH DUR SEARCH** setup on the Advanced Feature menu screen using the remote control unit's  or  button and press the remote control unit's  or  button to select between **ON/OFF**.

### SYNC OUT (DURING SQ) SETUP

This function sets whether a picture sync signal is output with video output when the player is stopped.

**OFF:** Video is always output and there is no loss of sync signal.

**ON:** There is loss of picture output at times other than playback or when menu screens are displayed.

For setup, move the ► (pointer) to **SYNC OUT (DURING SQ)** on the Advanced Feature menu screen using the remote control unit's  or  button and press the remote control unit's  or  button to select between **ON/OFF**.

### STACK MODE OSD SETUP

This function controls **ON/OFF** of **OSD** displays during stack playback.

**ON:** **STACK OSD** is displayed on the screen when search is used during stack playback.

**OFF:** **STACK OSD** is not displayed.

For setup, move the ► (pointer) to **STACK MODE OSD** on the Advanced feature menu screen using the remote control unit's  or  button and press the remote control unit's  or  button to select between **ON/OFF**.

## CHARACTER INPUT/PICTURE DRAWING

The video blackboard function of this unit allows you to draw characters and pictures just like on a blackboard. The drawn characters and pictures can be displayed alone or superimposed on the disc video.

### OPERATION USING THE MOUSE OR KEYBOARD

Connect the PS/2 mouse or PS/2 keyboard to the mouse/keyboard connector of this unit.

Be sure to put this unit to the standby mode or unplug the power cord before connecting the mouse or keyboard to this unit.

If you want to use both the mouse and keyboard, connect them using a commercially available "Y" cable.

\* The power rating for the mouse/keyboard connector of this unit is 5 V and no more than 100 mA.

Do not use a mouse or keyboard with a current drain exceeding the rating of 100 mA.

Certain PS/2 mouse models and PS/2 keyboard models may not be usable with this unit. For details, please consult PIONEER TECHNICAL SUPPORT.

### ACTIVATING THE BLACKBOARD FUNCTION

1. Press the **POWER** button.
2. Click the right button anytime to display the Blackboard screen.
  - This causes forward play to stop automatically. Forward play resumes when video blackboard mode is exited.

Blackboard screen

### INPUTTING CHARACTERS

1. Move the cursor to **ABC** and press click the mouse's left button.
2. Move the cursor to the position where you want to input the first character.
  - The cursor changes to the I cursor in the area where character input is possible.
3. Click the mouse's left button.
  - " \_ " is displayed overlapped with the I cursor.
4. Input a character.
  - Characters can also be input from the PC keyboard provided that this is connected.
  - The PC keyboard can input characters by distinguishing the numerals, symbols and uppercase/lowercase alphabet as well as carriage returns.
5. Click the mouse's right button after completing the input.
  - The Blackboard screen is displayed again.
  - To save the characters, use the procedure in "Saving characters or pictures" on page 20.

# CHARACTER INPUT/PICTURE DRAWING

Drawing tools

1

2

3

4

## USING THE DRAWING TOOLS

- Use the mouse's left button to select icon below.

(LINE): Draws a straight line.

(BOX): This tool can be switched by clicking to a tool for drawing a line-enclosed rectangle, solid-painted rectangle or a rectangle the outside of which is painted.

(ROUND): This tool can be switched by clicking to a tool for drawing an ellipse, solid-painted ellipse or an ellipse the outside of which is painted.

: This tool can be switched by clicking to a tool for drawing a thin, medium or thick line.

: Each click switches the color to Red, Blue, Green, Yellow, White, Black, Gray or Purple.

: Saves the drawn picture.

(See page 20 for the saving method.)

: Cancels the drawn picture. Each click cancels the last drawn picture.

Press with the mouse for more than 1 second to clear the entire drawing in the screen.

: Click the mouse to exits the current screen .

## NOTE

- The Direction buttons (8, 9, 6, 3, 2, 1, 4, 7) and ENTER button on the remote control unit can also be used for the above operation.
- The blackboard function will not function in a disc's menu screen.

## DRAWING A PICTURE

Press the mouse's left button at the point you want to start drawing and move the cursor (without releasing the mouse button). (This operation is referred to as dragging.)

- Select a drawing tool.
- Move cursor to the drawing start position.
- Drag.
  - A picture is drawn as you move the cursor.
- Release finger from the mouse.
  - Draw other pictures by repeating the above.

# CHARACTER INPUT/PICTURE DRAWING

1

2-4

5

6

## SAVING CHARACTERS OR PICTURES

1. Click the **SAVE** button on the screen.
  - The Save screen is displayed.
2. Display the video where you want to begin displaying the object or text.
  - "IN" blinks.
  - Display the video by controlling the player control icon at the bottom left of the screen.
3. Click the **SAVE** button on the screen.
  - "OUT" starts to blink.
  - This sets the display start position.
4. Display the video where you want to stop displaying the object or text.
  - Display the video by controlling the player control icon at the bottom left of the screen.
5. Click the **AUTO DISP** button on the screen.
  - This sets the display end position.
  - The characters or pictures are saved in the player's memory.
  - The group and step where they are saved are shown.
6. Click the **EXIT** button.
  - The Blackboard screen is displayed again.

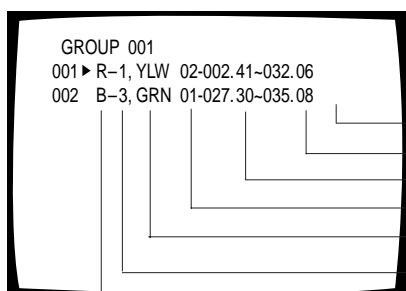

### NOTE:

By saving the characters and drawing without playing a disc, the drawing can be displayed in a desired scene. (See page 23 for executing method.)

### CAUTIONS:

- With a DVD, the start point (IN) and end point (OUT) can be set only within the same title.
- Should mention that video blackboard will not function in a disc's menu screen.
- The stored frame will have a  $\pm 1$  frame error.
- The Direction buttons (8, 9, 6, 3, 2, 1, 4, 7) and ENTER button on the remote control unit can also be used for the above operation.

## DETAILS ON THE BLACKBOARD

# CHARACTER INPUT/PICTURE DRAWING

## TO CHANGE THE DISPLAY MODE

1. Move the cursor to the line you want to change and click the left button of the mouse.
2. Move the cursor to **AUTO DISP** and click the left button of the mouse.

### Indicator display on the right edge of screen

A : Displayed at the same time as the disc playback, from the set start point through the set end point.

A S : The video becomes a still image at the set start point.

- A S : The video becomes a still image immediately before the set start point.

No display: The set characters or pictures are not displayed.

Pressing the **ENTER** button in this section starts drawing.

S : The video becomes the still image at the set start point but objects are not displayed.

Press the **ENTER** button on the remote control unit to start picture drawing.

\* : The \* mark is displayed on the top right of the screen during playback.

Pressing the **ENTER** button in this section starts drawing.

\* S : The video becomes a still image, in which only the \* mark is displayed, at the set start point.

Press the **ENTER** button on the remote control unit to start picture drawing.

### Meaning of displayed symbols

"S" stands for "Still image" and plays a still image at the IN point.

"A" stands for "Auto display", which displays drawing in the screen set with AUTO DISP.

"\*" displays only the \* marking.

"-" displays a still image immediately before the start of the IN point.

## PENCIL TOOL/FREEHAND DRAWING

Click the right button of the mouse in the video blackboard input screen to turn the pointer into the pencil tool. Freehand drawing is possible by holding the mouse's left button.

Clicking the right button again displays the Blackboard screen.

### CAUTION:

- Pictures can be drawn using the pencil tool but they cannot be saved later.
- To change the color or line width, select **COLOR** or the **LINE** tool on the Blackboard screen. (See "Drawing Tools" on page 19.)

Freehand drawing is possible by holding the mouse's left button.

# GROUPING VIDEO BLACKBOARDS

Step section

Group section

Select a group

Select a step

## GROUPING BLACKBOARDS

Blackboards can be registered by dividing them into groups according to the disc and title to enable selective use later.

This makes it possible to store drawn characters and pictures in positions matching the played images.

Pictures and characters comprising groups are also stored as steps. When executing the blackboards, arbitrary registered blackboard groups can be selected and displayed.

It is also possible to delete blackboards on a per-group basis.

When ▶ (pointer) appears to the left of DISPLAY or GROUP on the setup screen (refer to page 20), the group can be selected by pressing NEXT, PREV. Pressing SAVE will then enter that group.

When ▶ (pointer) appears to the left of GROUP, pressing the DEL button will cancel that groups content.

## EXECUTING AN ENTIRE GROUP TO EXECUTE A GROUP

1. Press the button.
2. Press the button twice.
  - The step section blinks.
  - The step section should continue displaying 000.
  - When the step is 000, the entire group will be executed.
  - When a step is selected, only the selected step in the group will be executed.
3. Press .
4. Input the number of the group to be recalled/executed using the numeric buttons.

5. Press the button twice.
  - This starts execution according to the selected blackboard.

## TO EXECUTE STEPS IN A GROUP

1. Press the button.
2. Press the button twice.
3. Press if you want to switch the group.
  - If you do not want to change the group, go to step 6 below.
4. Input the number of the group to be recalled/executed using the numeric buttons.
5. Press the button.
6. Input the number of the step to begin execution using the numeric buttons.
7. Press the button.
  - This starts execution of the selected step in the selected group.
  - The step setup is released after the step has been executed.

## GROUPING VIDEO BLACKBOARDS

Select a step

Select a group

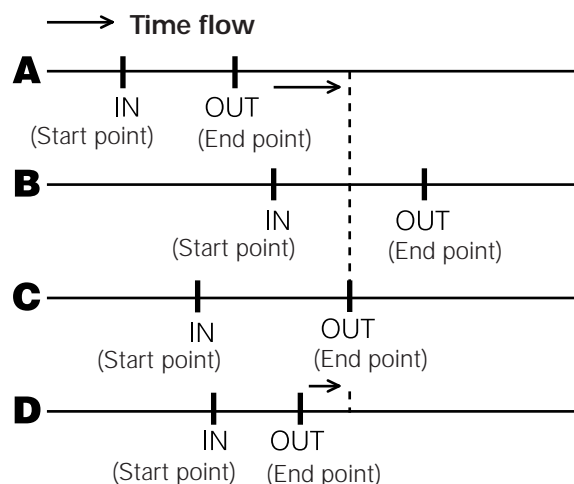

### RECALLING/EXECUTING PREVIOUSLY INPUT BLACKBOARDS WHILE OBSERVING THEIR LIST

1. Press the **FUNCTION** button.
2. Press the **MEMORY RECALL** button twice.
3. Press the **FUNCTION** button and press the **DISP REPEAT** button.  
• This displays a list of commands.
4. Select a group by pressing the **▶ NEXT** or **◀ PREV** button.
5. Select a step by pressing the **▶ NEXT** or **◀ PREV** button.
6. Press the **ENTER** button.

#### NOTE

Press the **CLEAR** button to clear the characters or pictures being displayed. However, characters and pictures that have been set with the **AUTO DISP** button cannot be cleared with the **CLEAR** button.

#### Example

#### Display of the recalled characters and pictures

Characters and pictures recalled by "Executing an entire group" are not displayed in the order they were registered but in order of the locations of the set display start points. When a character or picture is displayed while another character or picture is already displayed, the newly displayed character/picture is superimposed above the existing character/picture, and all characters/pictures are displayed until the last display end point among the set display end points.

- When pictures A and B are displayed, picture B appears after the display of picture A has ended.
- When pictures A and C are displayed, picture C appears above picture A which is already displayed, and the display of pictures A and C ends at the picture C end point.
- When pictures C and D are displayed, picture D appears above picture C which is already displayed, and the display of pictures C and D ends at the picture C end point.

## INTRODUCTION

This player can be used as follows using the Barcode stack/Command stack function

- Commands in the barcode book included with the disc can be memorized in the player in advance. (Barcode stack function.)
- Barcodes can be set using the provided remote control for discs that do not have barcodes, or for commands that you want to use that are not provided with barcodes. (Command stack function.)
- The remote control can be used for recall and successive execution or step by step execution of memorized content.

### CAUTION:

*In the case of laser barcode compatible discs, barcodes for industrial LD use can be used as is (please check that such discs include the  mark). Use of the LB  barcode sheet for unmarked discs is not possible.*

### CAUTION:

*The Barcode stack/Command stack function will not operate with CDs.*

### NOTE:

*The maximum number of steps that can be memorized in the player is 300 steps including video blackboards.*

## BASIC USAGE

How to use the barcode stack/command stack function is indicated as follows:

- 1) **Display the barcode stack/command stack setup screen with the remote control**  
⇒ Page 25
- 2) **Input the barcode with the barcode reader and transmit to player** ⇒ Page 26
  - Input can also be done with the remote control unit.  
In the case of LaserBarcode compatible discs ⇒ page 30  
In the case of regular DVD discs ⇒ Page 26~29
- 3) **Repeat step 2 in the desired playback order.**
- 4) **When input is finished, store in the player's memory** ⇒ Page 31
- 5) **Execution** ⇒ Page 42, 43

## ADVANCED USAGE

With the barcode stack/command stack function of this unit, groups can be divided and memorized without influencing previously input commands.

This is convenient for separate memorization of contents of more than one disc, or when one player is being jointly used by many people.

To register a group separate to the already previously memorized content

### 1) Register a new group ⇒ Page 35

"GROUP 002" on the top right of the barcode stack/command stack input screen is the group number that will be memorized.

As the group number will be important for execution, please make a note of it so that you do not forget it.

### 2) Input the barcode with the barcode reader and transmit to player ⇒ Page 26

- Input can also be done with the remote control unit.  
In the case of laser barcode compatible discs ⇒ Page 30  
In the case of regular DVD discs ⇒ Page 26~29

### 3) Repeat step 2 in the desired playback order.

### 4) When input is finished, store in the player's memory ⇒ Page 31

### 5) Execution ⇒ Page 42, 43

At this time please select the group number that was noted in step 1.

### NOTE:

*Commands stored in the player's memory can be grouped together or divided ⇒ Page 38~41.*

*Please note, however, that the order of commands can not*

# BARCODE/COMMAND STACK SETTING

The player can store commands input using LASERBARCORD 2 and DVD barcodes. The stored commands can be recalled for either successive or step-by-step execution.

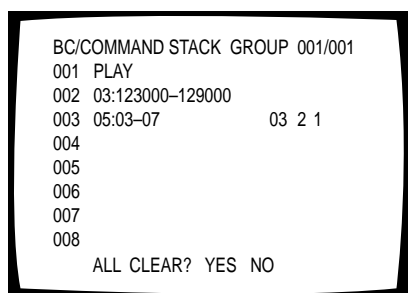

## DISPLAYING THE BARCODE/COMMAND STACK SCREEN

1

BARCODE/COMMAND STACK screen

2

1. Press the button.

- "BARCODE/COMMAND" is displayed.

2. Press the button.

- The Barcode/Command Stack screen is displayed.
- If barcodes have already been input, their data are shown in the screen.  
Select whether barcodes are to be input by erasing existing barcodes or by adding them to the existing barcodes.
- To input new barcodes from the beginning, select "YES" with the or button and press the button.
- To add new barcodes to existing barcodes, select "NO" with the or button and press the button.
- Press the button to display the Barcode/Command Stack Input screen.
- When barcodes have not been input, the BARCODE/COMMAND STACK input screen will be displayed.

The barcode/command stack input screen appears.

- The setting procedure of this screen will be described in the subsequent pages.
- Barcode/Command Stacks can be set directly using a barcode reader (optional) or set using the remote control unit.

# BARCODE/COMMAND STACK SETTING

1

2

## DIRECT SETTING USING A BARCODE READER

1. Read a barcode with a barcode reader.
2. Send it to the player.

Example 1) Read "PLAY" and send it.

Example 2) Read "Play Title 8 Chapters 5 to 12 with Subtitle 3, Audio 2 and Angle 1" and send it.

## SETTING USING THE REMOTE CONTROL UNIT

Five commands including Play ►, Pause ■, ◀■ Still/Step ■► and Stop ■ can be set using the remote control unit. The chapter search, chapter play, frame search and frame segment play commands can also be set using the remote control unit.

1. Press the  button.

- The TITLE number will blink and the input mode will be selected.

**Example 1) To set "Play"**

Press the  button.

- The Barcode/Command Stack Input screen shows "PLAY" and increments to the next Input screen.

Display when the example on the right is input

## BARCODE/COMMAND STACK SETTING

Pressing the  button switches over to the following display.

**Example 4) To input the command for setting Subtitle 1, Audio 2 and Angle 3**

1. Press the  button.
  - The TITLE number will blink.
2. Press the  while the TITLE digits are blinking.
3. When the SUBTITLE digits start to blink, press  then .
4. When the AUDIO digit starts to blink, press .
5. When the ANGLE digit starts to blink, press .

- With a play command that specifies the start and end frames, it is not possible to set the subtitle, audio and angle simultaneously. However, by placing the subtitle, audio and angle setting command as described above before the frame section play command, the section playback can be executed with the specified setting.

The input as shown above allows to play title 3 frames 10000 to 15000 by setting Subtitle 1, Audio 2 and Angle 3.

With commands other than the frame section play command, such as the frame search, chapter search and chapter section play commands, the specified setting is valid within each command.

**Example 5) To repeat "Play Title 3 frames 123000 to 129000" in Example 2**

1. Perform steps 1 to 6 in Example 2.
  - The BARCODE/COMMAND STACK input screen of the next step appears.
2. Press the  button while the title number is blinking.
3. Press the  button.
  - The REPEAT indicator appears on the screen.

## BARCODE/COMMAND STACK SETTING

### SETTING THE SUBTITLE, AUDIO AND ANGLE

#### SUBTITLE

- "00" turns the screen color to the color specified in "Background color" in the GUI menu and makes the played image invisible.
- "01" to "32" displays the corresponding subtitle.
- "33" plays with Subtitle OFF.
- "34" is used to make the played image made invisible with "00" visible again.
- "99" retains the previous condition. This is used to change other setting than SUBTITLE while maintaining the SUBTITLE setting the same.
- "35" to "98" are invalid.

#### AUDIO

- "0" plays image with Audio OFF.
- "1" to "8" selects and plays the corresponding audio.
- "9" retains the previous condition.

#### ANGLE

- "1" to "8" selects and plays the corresponding angle.
- "9" retains the previous condition.
- "0" selects and plays Angle 9.

#### CAUTION

- When "retain the previous condition" is selected, "\*" is displayed in the input screen.
- The barcode/command stack cannot be executed if a value that does not exist in the disc is input.

### TO USE ONLY THE CHAPTER SEARCH OR FRAME SEARCH

In item "MARK CHAPTER" or "MARK FRAME", simply press the  button without setting anything.

A still image is displayed after search., still image is displayed after search.

### TO CHANGE A VALUE DURING INPUT

Press the numeric button of the correct number (including 0).

To return to a previous setting point, press the  button.

### TO CANCEL INPUT IN THE MIDDLE

Press the  button to return to the cursor mode, move the ► (pointer) to "EXIT" by pressing the  button and press the  button.

## BARCODE/COMMAND STACK SETTING

### SETUP OF LASERBARCODE COMPATIBLE DISCS

BC/COMMAND STACK GROUP 001: 001			
TITLE		LD	
SEARCH FRAME		01500	
MARK FRAME		01800	
VIDEO		0	
AUDIO		3	

Display when the example on the right is input

Example) Playback of "analog stereo" audio channel from frame 1500 to 1800 without video.

1. Press the button.
  - The TITLE number will blink.
2. Press the button to display LD.
  - Be sure to set the laser barcode compatible disc command to the TITLE LD display.
3. Press → → → → .
  - The start frame number is entered.
  - If the procedure up until this point has been done during playback, the start frame that was input is searched for.
4. Press → → → → .
  - The stop frame number is entered.
5. As the VIDEO number will blink, press .
  - The playback picture disappears.
6. As the AUDIO number will blink, press .
  - Audio will be entered and the next step proceeded to.
7. Press the button to return to the cursor mode.

#### NOTE:

Pressing the button after step 2 will select the chapter input mode. Refer to example 3 on page 27 for the input methods of SEARCH CHAPTER and MARK CHAPTER.

## VIDEO, AUDIO SETUP

#### VIDEO:

- Inputting 1 selects normal video output.
- Inputting 0 selects the background color set on the GUI menu and cancels the playback picture.
- Inputting 9 maintains the previous mode. Input when you want to leave the VIDEO setting as is and change other settings.
- 2 to 8 are invalid.

#### AUDIO:

On laser barcode compatible discs, laser disc digital audio and analog audio are converted and recorded in the DVD format. Audio can be selected as follows.

- Inputting 0 selects the Audio OFF playback mode.
- Inputting 1 selects the "Analog audio 1/L" playback mode.
- Inputting 2 selects the "Analog audio 2/R" playback mode.
- Inputting 3 selects the "Analog audio" stereo mode.
- Inputting 5 selects the "Digital audio 1/L" mode.
- Inputting 6 selects the "Digital audio 2/R" mode.
- Inputting 7 selects the "Digital audio" stereo mode.
- Inputting 9 maintains the previous mode.
- 4 and 8 are invalid.

#### CAUTION:

When "Maintaining previous mode" is selected " \*" is displayed on the input screen.

## SAVING BARCODE/COMMAND STACK

▶SAVE DEL INS EXIT		

The display disappears.

### SAVING A BARCODE/COMMAND STACK

When the input operations shown in the example have completed till the end, the bar code stack/command stack input screen for the next step appears in a few seconds.

When this screen appears, press the or button to move ▶ (pointer) to SAVE and press the button.

- The display disappears and the input information is saved.

#### NOTES:

- The input information is not saved if ▶ (pointer) is moved to SAVE and the button is pressed before the bar code stack/command stack input screen for the next step appears.
- The input information is not saved if ▶ (pointer) is moved to EXIT and the button is pressed.

## TO DELETE A PREVIOUSLY INPUT BARCODE/COMMAND STACK

### TO DELETE A PREVIOUSLY INPUT BARCODE/COMMAND STACK

1. Press the button.
  - "BARCODE/COMMAND" is displayed.
2. Press the button.
  - The Barcode/Command Stack screen is displayed.
3. Select "NO" with the or button and press the button.
  - The Barcode/Command Stack Input screen is displayed when the button is pressed.
4. Press the button.
  - The list display appears.
5. Move the ▶ (pointer) to "DEL" by pressing the button.
6. Select the step to be deleted by pressing the or button.
7. Press the button.
  - The selected step is deleted and the numbers of the subsequent steps are decremented by 1.
8. Move the ▶ (pointer) to "SAVE" by pressing the button and press the button.

#### IMPORTANT:

Even if you have come to step 7 in the above deletion procedure, you can still abort deletion by moving the ▶ (pointer) to "EXIT" by pressing the button then pressing the button. The deletion is entered in memory when the "SAVE" operation is performed in step 8.

## CORRECTING A PREVIOUSLY INPUT BARCODE/COMMAND STACK

BC/COMMAND STACK GROUP 001: 003

### CORRECTING A PREVIOUSLY INPUT BARCODE/COMMAND STACK

Example) To change the Audio setting of step 003 from 2 to 1

1. Press the button.
  - "BARCODE/COMMAND" is displayed.
2. Press the button.
  - The Barcode/Command Stack screen is displayed.
3. Select "NO" with the or button and press the button.
  - The Barcode/Command Stack Input screen is displayed when the button is pressed.
4. Press the button.
  - The list display appears.
5. Select "003 ▶" by pressing the or button.
6. Press the button.
  - This initiates the Barcode/Command Stack input mode.
7. Press the button to initiate the numeral input mode.
8. Press the button 4 times to select item "AUDIO".
9. Press button.
10. Press button.
  - The next step's Barcode/Command Input screen is displayed.
11. Press the button to return to the cursor mode.
12. Move the ▶ (pointer) to "SAVE" by pressing the button and press the button.

#### CAUTION:

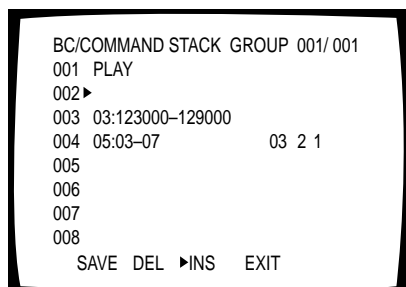

To save the corrected information, move ▶ (pointer) to the last item (ANGLE in this example) by pressing the button repeatedly.

Press the button one more time to move to the page for the next step.

In this "next step", move ▶ (pointer) to SAVE and press the button to save data.

The corrected information is not saved if ▶ (pointer) is moved to SAVE and the button is pressed before the end of correction (in the middle of the step being corrected).

## ADDING A STEP IN A PREVIOUSLY INPUT BARCODE/COMMAND STACK

### ADDING A STEP IN A PREVIOUSLY INPUT BARCODE/COMMAND STACK

1. Perform steps 1 to 4 of "Correcting a previously input Barcode/Command Stack".
2. Select the step where a new step is to be inserted by pressing the  or  button.
3. Move the > (pointer) to "INS" by pressing the  or  button and press the  button.
  - This inserts a new step before the selected step and the numbers of subsequent steps are incremented by 1.
4. Press the  button.
  - This initiates the Barcode/Command Stack input mode.
5. Press the  button to initiate the numeral input mode.
6. Set a step in the same way as "Setting a barcode command".
7. Move the > (pointer) to "SAVE" by pressing the  button and press the  button.

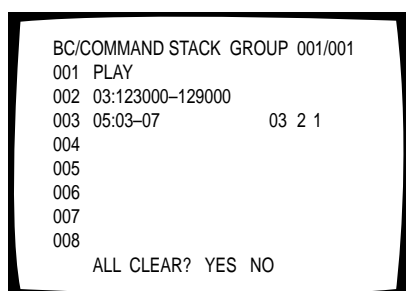

## GROUPING SOME BARCODE/COMMAND STACKS

1

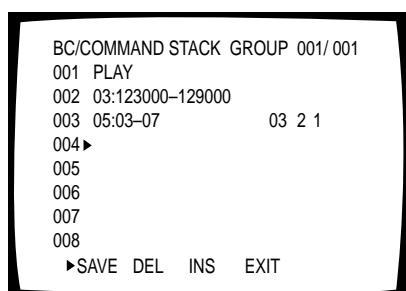

2

3

4

5

### GROUPING SOME BARCODE/COMMAND STACKS

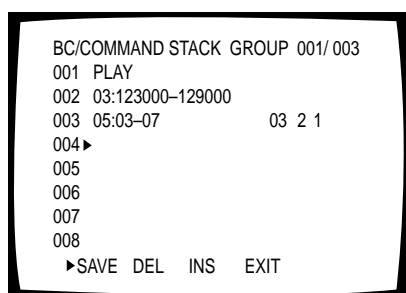

#### Grouping of Barcode/Command Stacks

A group can be formed with several Barcode/Command Stacks, and more than one group can be formed and stored. When executing a group of commands, select a group from the stored groups and execute them either consecutively or step by step. It is also possible to divide or delete a group.

The following procedure consists of inserting a group delimiter after a group of barcode commands.

1. Press the button.
  - "BARCODE/COMMAND" is displayed.
2. Press the button.
  - The Barcode/Command Stack screen is displayed.
3. Select "NO" with the or button and press the button.
  - The Barcode/Command Stack Input screen is displayed when the button is pressed.
4. Press the button.
  - The list display appears.
  - Make sure that the ► (pointer) is located at the step immediately following the last entry.
5. Press the button.
  - The input screen for the first step of the next Barcode/Command Stack group appears.
  - The Barcode/Command Stacks of the next group can be set from here.

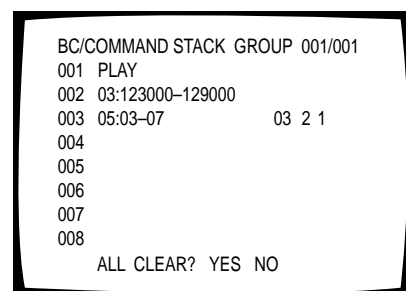

## GROUPING SOME BARCODE/COMMAND STACKS

1

2

3

### SWITCHING THE BARCODE/COMMAND STACK GROUP

1. Press the button.
  - "BARCODE/COMMAND" is displayed.
2. Press the button.
  - The Barcode/Command Stack screen is displayed.
3. Select "NO" with the or button and press the button.
  - The Barcode Input screen is displayed when the button is pressed.
4. Press the button.
  - The list display appears.
5. Press the or button.
  - Pressing the button switches over to the next group.
  - Pressing the button switches over to the previous group.

### DELETING A GROUP

1. Press the button.
  - "BARCODE/COMMAND" is displayed.
2. Press the button.
  - The Barcode/Command Stack screen is displayed.
3. Select "NO" with the or button and press the button.
  - The Barcode Input screen is displayed when the button is pressed.

SAVE▶DEL  INS  EXIT
```

6. Move the ▶ (pointer) to "DEL" by pressing the  button.

7

```
BC/COMMAND STACK GROUP 003/ 003
001 02:000150-002050
002 06:22-23          * * *
003▶PLAY
004 03:123000-129000
005 05:03-07          03 2 1
006
007
008
SAVE▶DEL  INS  EXIT
```

7. Press the  button.

- This deletes the group delimiter and joins the current group with the next group to it.
- The numbers of the groups after the current group are decremented by 1.

8

```
BC/COMMAND STACK GROUP 003/ 003
001 02:000150-002050
002 06:22-23          * * *
003▶PLAY
004 03:123000-129000
005 05:03-07          03 2 1
006
007
008
▶SAVE DEL  INS  EXIT
```

8. Move the ▶ (pointer) to "SAVE" by pressing the  button and press the  button.

### IMPORTANT

Even if you have come to step 7 in the above group Joining, you can still abort group by moving the ▶ (pointer) to "EXIT" by pressing the  button then pressing the  button. The group is entered in memory when the "SAVE" operation is performed in step 8.

# USING A BARCODE/COMAND STACK

Switch the command group.

Recall screen

Switch the command step.

Recall screen

## RECALLING/EXECUTING BARCODE COMMANDS IN MEMORY

To execute a barcode command group:

Place the disc containing commands on the disc tray.

1. Press the  button.
2. Press the  button.
3. Press the  button.
4. Input the number of the command group to be recalled/ executed using the numeric buttons.
5. Press the  button twice.
  - This recalls and executes the selected group.

## TO EXECUTE STEPS IN A COMMAND GROUP

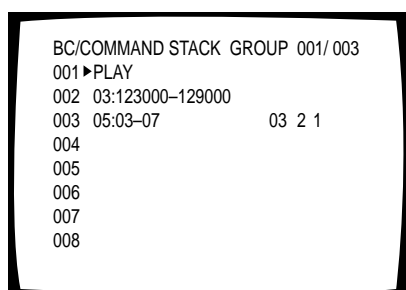

1. Press the  button.
2. Press the  button.
3. Press the  button.
4. Input the number of the command group to be recalled/ executed using the numeric buttons.
5. Press the  button.
  - To re-enter the group number, press the  button.
6. Input the number of the step to begin execution using the numeric buttons.
7. Press the  button.
  - This recalls and executes the selected and subsequent steps in the selected group.

### NOTES:

- Pressing the  button while the FUNCTION indicator is lit repeats the execution of the set command.
- If you press the  button in place of the  button in step 6 above, command steps will be executed step by step. After every step has been executed, press the  button to advance to the next step. Pressing the  button allows you to return to the previous step.

## USING A BARCODE/COMAND STACK

BARCODE/COMMAND STACK screen

### RECALLING/EXECUTING PREVIOUSLY INPUT BARCODE COMMANDS FROM THE LIST VIEW

1. Press the  button.
2. Press the  button.
3. Press the  button.
  - The  button is defeated unless the function mode is switched off.
4. Press the  button.
  - This displays a list of commands.
5. Select a group by pressing the  or  button.
  - Select the command group containing the command(s) to be executed.
6. Select a step by pressing the  or  button.
  - Select the command step to begin execution with. If the command step number is left to "001" in this step, the commands in the entire command group will be executed.
7. Press the  or  button.
  - Pressing the  button starts consecutive execution.
  - Pressing the  button starts step-by-step execution.

**Some titles may not be able to be recalled and executed. Example)**

The search command cannot be executed with a title that does not show the chapter, time and similar information on the screen or with a disc that is not permitted to use the search function.

# HOW TO DISPLAY TOTAL HOURS PLAYED AND TOTAL POWER ON TIME

This unit is capable of displaying the total play time and power ON time as the working condition and maintenance timing information.

The play time and power ON time can be displayed as described below.

**1. Press and hold the DISPLAY button on the front panel of the main unit before turning power ON, and press the POWER button.**

**2. The screen shows the following:**

Power ON time, which is 105 hours 46 minutes in this example.

Total play time, which is 78 hours 13 minutes in this example.

## **CAUTION**

As the time is measured by the CPU clock, the information includes an error of up to 2%.

**3. When an operation (playback from the remote, for example) is performed, the time information display disappears and normal operation starts.**

# EXTERNAL SYNCHRONIZING FUNCTION

Through external input of a synchronization signal (black burst), video output signals can be synchronized with external signals on the DVD-V7200. (During DVD disc playback.)

Through the use of this function, video switch timing can be matched, and switching can be done without causing picture disturbance on the TV without the need for such devices as a TBC (Time Base Collector).

## Synchronized use of 2 or more players

- Make sure that the terminator switch is ON on the terminal player and OFF on the other players.
- When applying synchronization to one player, set the terminator switch to ON.

Sync generator

Input: Black burst signal

Sync accuracy  $\pm 1H$  for input synchronization signal (During DVD disc playback)

### NOTE:

Externally synchronizing 2 or more DVD-V7200 players, simultaneously starting video, and obtaining sync at the frame position for playback is not possible with this player.

Because of timing of reception of the STILL to PLAY command and DVD disc content, an unevenness of approximately 2 frames may occur.

Should this product require service in the U.S.A. and you wish to locate the nearest Pioneer Authorized Independent Service Company, or if you wish to purchase replacement parts, operating instructions, service manuals, or accessories, please call the number shown below.

1 – 8 0 0 – 8 7 2 – 4 1 5 9
